andywilliam.github.io

Recently completed a six-month course in Front-end Web Application Development, gaining expertise in technologies such as HTML, CSS, and JavaScript frameworks. Acquiring a thorough understanding of how front-end applications interact with APIs and other back-end technologies to enhance my web development skillset.

EXPERIENCE

World Trade Center, Bentonville, AR
Front-End Developer Intern
In Progress

Developing a new website for the World Trade Center in Bentonville. Working in HTML, CSS, JavaScript along with a third party hosting service.

University of Arkansas, Fayetteville, AR
Computer Support Technician & Supervisor
January 2023 - Present (Promotion)

- Demonstrated knowledge of personal computer operations and software functions
- Strong technical skills in the use of PC/Mac hardware and industry standard software
- Exceptional people skills, strong work ethic and leadership abilities
- Provided technical support to students, faculty and staff in a university IT Computing Lab or service desk environment
- Evaluated, diagnosed and resolved software and hardware problems
- Trained and supervised 12 student workers, organized student tech center and work schedules
- Determined the cause of computer or software problems and resolved or referred for maintenance and repair

University of Arkansas, Fayetteville, AR
Computer Lab Technician
October 2022 - January 2023

As a Computer Lab Technician, I assisted students with hardware and software and worked closely with students, staff, and faculty. I provided excellent customer service, responded to technical questions, and troubleshooted printing issues. I also managed equipment checkouts for students, staff, and faculty.
